The list of campsites and huts is a supplement to the CYCLING ICELAND 2017 map, providing cycling-specific information on almost all ca. 250 campsites in Iceland. All information provided by the site owners in 2016 and 2017. We put our effort in validating most information, but we can not assume responsibility for any errors. Camping outside of designated campsites

Travellers are expected to use the designated campsites. If you are not able to reach the next campsite, hikers and cyclists are permitted to put up a normal hiking tent for one night anywhere along the road / track / path except on cultivated land, too close to residential buildings, and in especially protected areas. Ask the owner for permission before camping on farmland or private ground. Observe that camper vans and caravans always have to use designated campsites.

Never drive or park vehicles off-road. Always take care to leave all stones, moss, grass and trees intact and exactly as you found them and take all garbage with you.
